Mumbai, India | akshaywaghela1111@gmail.com | +91 7400124094 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Data Analyst with 2.5+ years of experience delivering actionable insights through Python, SQL, and BI dashboarding across pharma, finance, and research domains. Proven ability to automate data pipelines, and communicate complex findings to non-technical stakeholders to drive business decisions. Strong foundation in M.Sc. Statistics and Decision Sciences with hands-on experience in EDA, hypothesis testing, regression.

TECHNICAL SKILLS

Languages & Tools: Python, R, SQL, Google Apps Script, Excel (Advanced)

Data Analysis & EDA: Pandas, NumPy, Exploratory Data Analysis, Data Cleaning, Data Validation, ETL

Machine Learning: Scikit-learn, Regression, Classification, Decision Trees, Random Forest, SVM, CNNs, TensorFlow/Keras

NLP & AI: NLTK, spaCy, TF-IDF, Sentiment Analysis, Vector Embeddings, RAG (Retrieval-Augmented Generation)

Statistical Methods: Hypothesis Testing, ANOVA, Chi-square, Logistic Regression, A/B Testing

BI & Visualization: Power BI, Tableau, Looker Studio (Google Data Studio), Matplotlib, Streamlit

Databases: SQL Querying, Joins, Window Functions, Data Modeling

Practices: Data Governance, Data Quality Assurance, Agile Methodology, ETL Automation

WORK EXPERIENCE

Research Analyst | Pharmarack — Mumbai

Feb 2026 – Present

- Automated 10+ business-critical analytics and reporting workflows using Python (Pandas, NumPy, OpenPyXL), reducing manual reporting effort by 70–90%.
- Developed automated sales data consolidation pipelines processing 100,000+ transaction records across multiple monthly files, reducing report preparation time from hours to minutes.
- Built SKU analytics frameworks tracking MAT Growth, MoM Growth, Contribution %, Brand Performance, and Company Performance for thousands of SKUs, improving portfolio review efficiency.
- Designed state-level target allocation models using historical sales share analysis, enabling 100% automated target distribution and eliminating manual allocation exercises.
- Automated market share and contribution reporting across PT, MP, Brand, Product, and Geography hierarchies, reducing turnaround time by 80%+.
- Built automated data quality validation and cleansing routines, improving reporting accuracy and reducing manual reconciliation effort significantly.

Data Analyst | Axis My India — Mumbai

Dec 2025 – Feb 2026

- Analyzed 200,000+ survey records using statistical techniques to uncover patterns in government scheme adoption and beneficiary overlap.
- Evaluated program effectiveness across demographic segments and generated actionable insights for outreach strategy improvement.
- Delivered data-driven targeting recommendations to help improve scheme penetration and reduce resource wastage.

MIS Data Analyst | Arbour Alternate Advisors — Mumbai

Apr 2025 – Nov 2025

- Built 10+ interactive dashboards in Looker Studio monitoring KPIs across HR, recruitment, and finance — directly used by leadership for strategic decisions.
- Automated data pipelines and reporting workflows using Google Apps Script and SQL, improving data accuracy by 20% and eliminating manual errors.
- Conducted EDA to identify process inefficiencies across HR and Finance functions, presenting findings and optimization recommendations to stakeholders.
- Translated business KPIs into real-time data metrics in an agile environment, enabling cross-functional teams to track performance and respond to trends proactively.

MIS Executive | Arbour Investments - Mumbai

Sep 2023 – Mar 2025

- Designed end-to-end workflow automation systems cutting operational processing time by 30% across multiple departments.
- Built a web-based investor onboarding application, reducing onboarding time by 15% and data retrieval time by 35%.
- Implemented 40+ real-time process tracking dashboards with bottleneck summaries, giving management instant operational visibility.
- Engineered an automated task reminder and submission system across 10+ departments, reducing delays by 20%.
- Streamlined reimbursement and approval cycles by 30% and 25% respectively through data-driven process redesign.

Data Analyst Intern | The Sparks Foundation - Remote

Apr 2021 – May 2021

- Built and evaluated ML classification models in Python achieving 80%+ accuracy, covering full pipeline from EDA to model deployment.

PROJECTS

Tweet Sentiment Analysis - NLP Pipeline at Scale

- Built an NLP classification pipeline on 30,000+ real-world tweets using tokenization, lemmatization, TF-IDF vectorization, and ML classifiers; achieved 87% accuracy.

Statistical Analysis of Hospital Preference

- Conducted a study on 342 respondents applying logistic regression, Chi-square tests, and hypothesis testing to identify key factors driving hospital selection behavior.

Personalized Book Recommendation System

- Built a content-based book recommender using collaborative filtering and NLP techniques on user ratings and metadata.
- Delivered personalized top-N recommendations with explainable reasoning based on genre, author, and reading patterns.

Voter Turnout Prediction - 2022 Elections Study 2023

- Collected and analyzed 320 survey responses on voting behavior in Vadodara; built logistic regression model to predict voter turnout.
- Designed civic awareness score metric; found income, profession, and religion as key predictors - provided actionable insights for NGOs and policy makers.

EDUCATION

Master of Science - Statistics

Jul 2021 – May 2023

The Maharaja Sayajirao University of Baroda | CGPA: 7.34/10

Bachelor of Science - Mathematics & Statistics

Aug 2018 – May 2021

Bhavan's College, University of Mumbai | CGPA: 9.86/10

CERTIFICATIONS & TRAINING

- People Analytics - LinkedIn Learning (Jul 2026)
- Deloitte Australia - Data Analytics Job Simulation, Forage (Jul 2026)
- BCG - Data Science Job Simulation
- Accenture - Data Analytics and Visualization Job Simulation
- Data Analysis with Python - freeCodeCamp (Mar 2025)
- Data Science and Machine Learning - Udemy (2022–2023)
- Case Study of Data Analysis - upGrad (Jun 2023)
- TCS iON Career Edge: Young Professional - TCS (Nov 2024)

AWARDS & RECOGNITION

- INSPIRE Scholarship - Top 1% in State HSC, Government of India
- Gold Badges in SQL & Python - HackerRank
- 2nd Rank, B.Sc. Statistics - Department of Statistics, Bhavan's College
